Mrs. W. B. Wedell returned yesterday from a 10-day fishing trip in Idaho.

Call Allen, phone 22, for carriages for funerals and operas. Private calls a specialty. Also prompt delivery of baggage. 412 25th.

H. C. Munsey, proprietor of the hotel at Lucin, is a visitor in Ogden.

Get your Union Pacific and Oregon Short Line tickets at the office in the Opera House block. Doors force your self to stand in line at the Depot.

Henry Flamm, the Rexburg, Idaho, merchant is in Ogden on business.

For Sale—Old mares. Good to put under carpets. Inquire Standard office.

Marriage License—A marriage license was issued yesterday afternoon to Earl C. Uphergrove aged 31, of Jackson, Mich., and Miss Orpha Terwilliger, aged 19, of Fremont Colo.

Advertisers must have their copy for the Evening Standard the evening before the day on which the advertisement is to appear, in order to insure publication.

Petition for Letters—Annie McFarland has filed a petition in the District court asking for letters of administration in the estate of her deceased husband, Hyrum McFarland, who died May 31, 1910, at Carlin, Nev. The deceased left property in Weber county valued at about \$1250. The land owned by the McFarlands is located near the corner of Twenty-fourth street and Monroe avenue.

WANTED—Clean white rags at the Standard.

Guardianship Letters—A petition has been filed in the District court by William Lund asking for the guardianship of Gertrude, Vern, Leonard, Ira, and John Wesley Beckman, grandchildren of Carl E. Bengson. The petitioner is an uncle of the children, who range in age from three to fourteen years, and states that they have no nearer relative who is willing to take them as wards.

SELLING HORSE MEAT.

Washington, Aug. 10.—Tensions in the countries of northern Europe are adverse to eating horse meat; wherefore they protested when reports were spread among them to the effect that horse meat was being shipped to them from the United States. The American consuls at Hull and Newcastle, England, reported today that no horse meat from the United States has reached English ports. Walter C. Hamm, American consul at Hull informed the department that while no horse meat from the United States has reached that port, there has been a traffic in live, worn out English horses between Hull and Continental ports where they have been sold for food.

FAVOR HIGH LICENSE.

Gran Junction, Colo., Aug. 9.—High license as opposed to prohibition was endorsed by the State Federation of Labor in convention here today. An effort to have the Socialist party endorsed was defeated.

SALT LAKE AND STATE NEWS

GOVERNORS MEET IN SALT LAKE

SALT LAKE CITY, Utah, Aug. 9.—Tentative steps looking to a conference of governors of northwestern and Pacific coast states preliminary to the meeting of the National conservation congress at St. Paul, have been taken by Governor Hay of Washington. Executives of nine states have been invited to meet at Salt Lake City, preferably between the 5th and the 15th of August, and discuss conservation problems with a view to the adoption of a harmonious policy.

Governor Hay has been in correspondence with Governor Spry, of Utah. Governor Spry telegraphed a cordial invitation to the Washington executive to make this city the meeting place and is awaiting a definite reply.

"I have learned from his communication to me," said Governor Spry this evening, "that Governor Hay feels strongly over some of the matters that will come up at the conservation congress and thinks it advisable for the western and northwestern governors to get together in advance in order that they may be prepared for concerted action. As to whether his grounds are well taken I am not prepared to say."

"The last information was that Governor Norris of Montana, Brooks of Wyoming and Shafroth of Colorado favored the conference idea, but that Governors Brooks and Shafroth wanted the meeting to be held in Denver. I have no information as to the attitude of the other governors involved."

STOCK EXCHANGE SHOWS ACTIVITY

SALT LAKE, Aug. 9.—Trading in mining securities on the local exchange this morning took on considerable activity and was quite lively. As a rule all stocks traded in were better. Colorado sold at 13 1/2 cents which is better than for several days. Columbia Consolidated has again the most active security on the market and there was considerable speculation in it this morning, many going into the market on a buyer. It reached a new high point of 77 cents yesterday afternoon. From that it ran up to 76 cents and then dropped to 75 cents. On the open board it reached the highest price.

Iron Blossom was unchanged around 74 cents. Sluice Consolidated was up slightly, reaching as high as 24 cents. During the open board session 1,000 shares of Emerald changed hands at 9 cents.

The total number of shares that changed hands was for the morning session 21,898, while the amount represented by the transactions was \$9,172.00.

Trading on the curb was devoted to Opex, the sales being 3,800 shares at 45 cents and 3,500 at 46.

MURRAY'S FIGHT ON POOL ROOMS

SALT LAKE, Aug. 9.—When the Murray city council meets tonight,

the fight against the pool room in the Smelter City, which was driven out of Salt Lake City, will begin. After being in operation one day, City Atty. J. Louis Brown decided that it was gambling, its worst form and criminal protection. He will institute under the state statute of no action is taken by the council to suppress it. Several councilmen also awakened to the fact that the pool room was a menace to the public morals, and that it brought an undesirable class of "touts," pickpockets and thugs to the city.

Mayor Bentz and a number of officials visited the pool room when it was in operation yesterday afternoon. Mayor Bentz did not seem to be so much impressed with the place and several of the officials found out that it was a "sure thing" game and ought not to be tolerated.

"The pool room was crowded with 'touts' and pickpockets who follow the race game, making a living of the easy marks who play their money on their tips. The place was also visited by a number of Murray's prominent citizens and what they think about the pool room will probably be expressed in the council chamber tonight."

J. A. Cornwall was the second victim of pickpockets on the Murray car yesterday afternoon. He lost a purse containing about \$12. He was jostled in the car by a crowd of men, evidently bound for the pool room. In a few minutes after he left the car, he discovered that his purse had been taken.

THE SALMON REGION IN CENTRAL IDAHO

Fatal Accident and Fatal Shooting; Many Mines Being Worked With Profit.

Salmon City, Idaho, Aug. 10.—Crushed to death by a fall of rock, the body of John Doyle was found a few days ago by a party of prospectors on Big Deer Creek, twenty-five miles northwest of Salmon City, Idaho. He was about 35 years of age. He was well known in this district, where he had been prospecting for many years.

He was working alone when the accident happened, and the fallen rock showed that he had just struck a rich lead of gold-copper ore. It is not known how long he had been lying dead among his new found riches, as it was quite by chance that his body was discovered.

Daniel McInerney shot and killed Peeler Foster at Gilmore, south of Salmon City, at 3 o'clock Friday night. Foster was shot in the abdomen, the bullet passing out through his spine. McInerney is in the custody of Sheriff Waters of Lemhi county, Idaho. The men quarreled over a mining claim.

There is great activity among the mines in the Salmon City district. With the recent completion of the Gilmore and Pittsburgh railroad to this town from Armstead, on the Oregon Short Line, old properties are being worked with profit, being hitherto retarded for lack of transportation facilities. Electrical plants are being installed to furnish power to several of the claims.

The Salmon City district is rich in a variety of minerals. North of the town lie the gold and silver mining districts; west there is gold, copper, nickel and cobalt; northwest and down the Salmon river there is gold, and to the southwest there is a region rich in silver and lead.

Several coal prospects are being opened up in this vicinity. Within two miles of Salmon City is a mine which has furnished 60 per cent of the total coal output of the state of Idaho. The coal occurs in flat dipping sandstone, clay and shale deposits. The seam is approximately five feet in thickness.

Brick clay, of a quality suitable also for the manufacture of pottery, and quantities of fine building stone are found in the neighborhood. A company has recently been formed, capitalized at \$2,000,000, to work the aluminum beds, two miles from town. A plant will be installed to extract the aluminum from the clay, afterward using the tailings for brick.

Among the principal mines now working in the district are the following: Yellow Jacket Mining company has a sixty-stamp mill, which is being replaced by a 100-stamp mill. The ore is low grade. This property is owned by a New York syndicate.

At the Alton mine, owned by the Leesburg Mining company, there is a thirty-stamp mill, and a \$50,000 electric power plant will shortly be installed there.

The Ulysses mine, owned and operated by R. L. Edwards, is a good paying proposition, low grade, fine milling ore. Mr. Edwards also owns the Musgrove gold placers. A cyanide plant will be erected here.

The Blackbird district is said by experts to be the richest in copper in the west, destined to become a second Butte. As soon as the Gilmore and Pittsburgh railroad is built down the river an electric line will be constructed twenty-eight miles up Big creek to ship the high-grade copper, nickel and cobalt ores. These properties are owned by the Dubois syndicate of Pennsylvania, which also syndicate copper properties in Arizona.

The Richardson placers and the placers on Naples creek, working in the old Leesburg placer belt, are taking out plenty of dust. Both are good dredge propositions, but have hitherto been unable to secure sufficient capital for development.

The Moscow Creek dredge, recently changed hands on a paying basis for the last two years. An electric dredge will be installed on this property.

In the Junction and Gilmore districts are several lead-silver properties, which are now on a paying basis, since the G. & P. railroad touches that part of the country. Much interest is being shown by outside capitalists in the Salmon City district, which experts have stated to be the richest mineral belt in the west.

At present trains on the G. & P. run from Armstead to Salmon on Mondays, Wednesdays and Fridays, returning on the following days. The distance from Armstead, on the Oregon Short Line, is one hundred and twenty miles.

TOOK CARBOLIC BY MISTAKE. Provo, Aug. 10.—Miss Zelma Kennedy, a waitress at the Hotel Roberts, took a teaspoonful dose of carbolic acid Tuesday morning, thinking it was medicine. Miss Kennedy has

been in Provo for the past two years, coming here from Sioux City, Iowa. She has been afflicted at times with a pain in her side and Tuesday morning hurriedly went into her room and took a dose of the acid, mistaking it for a medicine which she had been in the habit of taking every morning. She was hurried to the Provo general hospital, where it was discovered that while her throat and mouth were severely burned, she will suffer no ill effects from the acid.

TRANSFER MAN SHOOTING HIMSELF

William Mason Attempts Suicide in Pioneer Saloon.

Salt Lake, Aug. 10.—"Come on, Matt, and have a drink; it will be the last time with me." Immediately after extending this invitation to a friend, William Mason, a driver for the Kimball Van & Storage company, walked into the rear of the Pioneer saloon at 51 West First South street and fired a bullet into his body with suicidal intent. The missile pierced the left lung just above the heart and his recovery is very doubtful. The cause of his rash act is believed to be despondency over a love affair with a woman who he supposed to be Mrs. W. A. Gleason of Tonopah, Nev.

A short time before attempting to end his life, Mason wrote a letter to the woman, and when he was removed to the emergency hospital a returned telegram was found in his pocket from the Western Union, which stated that his telegram to Mrs. Gleason, dated Monday, was not delivered for the reason that the party was unknown in Tonopah. It is believed by his associates that the woman had jilted him and, brooding over his disappointment in the love affair, he decided to end his life.

Mason is about twenty-six years of age and was employed as a driver for the Kimball Van & Storage company, where he has been employed for a year past. During the past week he has been very despondent, and has drunk to excess. Tuesday night he was in the Pioneer saloon with a number of friends and was drinking freely. Early in the evening he wrote a letter to the woman in the case and soon after completing the letter he made the attempt to end his life.

SIOUX CON. LOOKS VERY MUCH BETTER

Well-Known Tintic Citizen Says Ore Is Increasing in Value.

"One of the best little mines of the Tintic district is the Sioux Consolidated, a proposition which has made good, which has been pounded back and forth, but it is shipping a steady and generous tonnage of ore. There is a fine tonnage reported available for extraction and every one who should know asserts that it is a better grade rock than was being sent out six months ago. The company is working the usual number of miners, and conditions are favorable for the Sioux being listed among the Tintic shippers for an indefinite period."

This was the expression made use of Tuesday by Dr. C. P. Harvielle, the well-known physician and mining operator of the Tintic district. Dr. Harvielle will be remembered especially by the stockholders of the Opex company as the man who volunteered a few weeks ago to enter the Opex and assist in rescuing several miners who were overcome by gases following a premature explosion. From early afternoon until the next morning he worked like a Trojan, helping out the twenty-one men overcome and assisting in bringing the three men killed to the surface.

There are few men who have more extensive opportunities for observing mine conditions in Tintic, and the doctor's opinion regarding the Sioux Consolidated is the first given for several weeks by any one. When asked about the Opex, Dr. Harvielle stated that he was not more certain than the average citizen of the camp about mine conditions, but he was of the opinion that it is splendid ground and that ore would be found after the present programme of development is well advanced.

BRIGHAM'S INTERURBAN DELAYED IN CONSTRUCTION

Brigham City, Aug. 9.—Brigham citizens are somewhat disappointed to learn that the interurban road from the Hot Springs to this city will not be completed before Peach day, as was first intended. The officials of the Ogden Rapid Transit company have made every effort to push the road to completion, so as to haul passengers to the city on Peach day. September 7, but it appears now that it will be impossible to complete the road by that time even to operate with steam. The road has been completed as far north as Willard for traffic with the exception of electrification, and until the road is electrified, which will be about September 1, cars will be drawn by steam engines to Willard. It is the intention of the officials of the road to install regular service between Ogden and Willard on or about September 1.

The officials and citizens of Ogden were given a rousing welcome in Willard last week when the first train, composed of the two new coaches drawn by a steam locomotive, made its first appearance in the little town on the south. The citizens there have planned a big celebration for August 31, when regular service between there and Ogden has been promised by the road.

While no definite preparations have been made for a celebration in this city upon the advent of the street railway here, it is most likely that a big celebration will be held on the day the first through car from Ogden is due to arrive here. It will likely be two months before the road

At Fountains & Elsewhere Ask for "HORLICK'S"

The Original and Genuine Malted Milk The Food-drink for All Ages. At restaurants, hotels, and fountains. Delicious, invigorating and sustaining. Keep it on your sideboard at home. Don't travel without it. A quick lunch prepared in a minute. Take no limitation. Just say "HORLICK'S" in No Combine or Trust!

is completed, so there is plenty of time to make preparations.

Gradually the road has been completed to within two miles of the city and track laying is finished to a point about two miles north of Willard.

PINCHOT TO CONFER WITH ROOSEVELT

OYSTER BAY, L. I., Aug. 9.—Theodore Roosevelt spent this evening talking politics with Wm. Lusk, Jr., collector of the port of New York.

Tomorrow he expects to have a conference with Gifford Pinchot, former chief forester and James R. Garfield, ex-secretary of the interior. For the last two weeks there have been no political visitors at Sagamore Hill and the conference is taken as an indication that the ex-president may be preparing to engage more actively in political affairs.

One of the principal objects of Mr. Pinchot's coming visit, it is believed, is to acquaint Colonel Roosevelt with public affairs and particularly in conversation which is to be one of the topics discussed by the former president on his western trip.

Spent Day in Editorial Office. NEW YORK, Aug. 9.—Theodore Roosevelt spent the day in his editorial office in this city. Senator Bourne of Oregon met him by appointment.

"Was your talk with Colonel Roosevelt about politics?" the senator was asked.

"Not in the ordinary acceptance of the word," he replied, "yet, if successful in my mission, the result will be of the utmost importance."

"I explained to Mr. Roosevelt how Oregon through her initiative and referendum, direct primary, corrupt practices and recall laws has evolved, adopted and demonstrated the most effective form of popular government known to the world."

"Colonel Roosevelt's indorsement is not essential to the ultimate success of the cause, but, believing that he has the same confidence in the honesty and intelligence of the people that they have demonstrated they had in him, and appreciating his prominence before the world, I realize that his advocacy will accelerate the adoption of similar laws in other states. This was the mission of my call."

"What did he say?"

"You will have to ask him." Colonel Roosevelt, after the senator's departure, said he was greatly interested in his visitor's recital and favored progressive legislation.

FIVE PERSONS ARE INSTANTLY KILLED

CAPE MAY, N. J., Aug. 9.—Five persons were crushed to death tonight when a train on the Pennsylvania dashed into an automobile at Mill Lane crossing on the West Jersey and Seashore Railroad. The dead are:

FREDERICK W. FELDNER
MRS. FREDERICK W. FELDNER
FITZ MERTENHALER
MRS. FITZ MERTENHALER
M. C. JONES, chauffeur, all of Baltimore.

Mr. Mergenthaler was a son of Ottmar Mergenthaler, inventor of the Linotype.

The express train was hidden from view by a corn field. It was impossible for the chauffeur to see the train until he was within a few feet of the tracks. As the automobile bore down toward the train Mrs. Thomas McNeill, who lives near the crossing, saw the approaching express and waved her hand frantically for the automobile driver to stop his car, but the man either did not see the danger signal or thought he could cross the tracks before the train reached him. The express struck the automobile squarely between the wheels and threw it and all of the occupants clear of the tracks.

GAUGEL RIDES THREE WINNERS

BUTTE, Mont., Aug. 9.—Gaugel rode three winners today. Miss Naomi's victory in the fourth was one of the features of the day. Like on the previous occasion she skipped in apparently without half trying. Results:

First race, futurity course, selling: Philistina, 107 (Vesper) 7 to 2, won; Quick Trip, 109 (McBride) 7 to 1, second; Jellico, 102 (VanDusen) 8 to 1, third. Time, 1:11 3/5.

Second race, futurity course, selling: Titus II, 109 (Jahnsen) 3 to 1, won; Maurentania, 110 (D. Boland) 3 to 2, second; Mossback, 109 (Fischer) 20 to 1, third. Time, 1:11 1/5.

Third race, six furlongs, selling: Lord F. Forest, 108 (Gaugel) 7 to 1, won; McNally, 103 (Taylor) 13 to 5, second; Gretchen G., 101 (Callahan) 8 to 1, third. Time, 1:11 1/5.

Fourth race, one mile, selling: Miss Naomi, 105 (Fischer) 1 to 2, won; Livius, 107 (Lindhorst) 20 to 1, second; Yama, 110 (D. Boland) 8 to 1, third. Time, 1:41 2/5.

Fifth race, one mile, selling: Knight of Ivanhoe, 109 (Gaugel) 6 to 1, won; Mispricion, 105 (VanDusen) 6 to 1, second; J. C. Clem, 109 (Coburn) 8 to 1, third. Time, 1:42 2/5.

Sixth race, six furlongs, selling: May Sutton, 110 (Gaugel) 6 to 5, won; Santha, 110 (Jahnsen) 15 to 1, second; Preen, 112 (McBride) 8 to 5, third. Time, 1:15 3/5.

SAN DIEGO TO CELEBRATE OPENING OF CANAL

San Diego, Calif., Aug. 10.—California now is assured of two expeditions to celebrate the opening of the Panama canal in 1915. Voters of San Diego at a municipal election held today decided to issue bonds in the amount of \$1,000,000 for improvement of the city park, already selected as the exposition site and for the construction of permanent buildings which shall constitute the nucleus of the fair.

FELL FROM A CLIFF.

Colorado Springs, Colo., Aug. 10.—Despite a plunge of 70 feet from the top of a cliff into Bear Creek cañon, near here, today, Albert Norton, a bell boy employed at a local hotel, sustained no more serious injuries than a broken leg and severe bruises.

S.S.S. DRIVES OUT S.S.S. MALARIAL POISONING

Malaria is a systemic blood poison, a disease which gradually destroys the richness and nourishing elements of the blood. When the malarial poison begins to absorb the rich, red corpuscles of the circulation we see pale, sallow complexions, and a general impairment of health. But Malaria means more than this, and as the blood becomes weaker from the poison, the appetite fails, digestion is disturbed, chills and slight fever are frequent, and in aggravated cases boils and eruptions, liver spots, and even abscesses break out on the flesh. To sum it all up, Malaria means blood poverty, and the only way to cure the trouble is to enrich and purify the blood. Nothing is equal to S. S. S. as a blood purifier and it is specially adapted to the cure of malarial troubles, because it contains no harmful minerals, and while ridding the blood of the malarial poison, S. S. S. builds up the entire system by its fine tonic effects. If you are suffering with malaria, begin the use of S. S. S. at once, and by cleansing the blood, rid yourself of this wasting disease. Book on the Blood and any medical advice free to all. THE SWIFT SPECIFIC CO., ATLANTA, GA.
